

## All Intermediate and Advanced ESL Students!

Join us for a wonderful summer session, from June 5th - July 21st (6 weeks)!

We will spend the summer mornings reading She Built Ships During World War II, a wonderful book by Jeane Slone. It is a novel based on the memoirs of the women who worked in the Richmond, CA, shipyards as welders, building the ships used by our Navy in the war. The people in the book are fictional, but the things that happen to them are real local history!

This book has been simplified for English language learners, so anyone with intermediate reading skills will be able to understand it. It is a great way to learn our local history and English at the same time. The class is free, but each student is required to buy the workbook for \$15.

There is no minimum attendance requirement for these two classes this summer.

We will have two class sessions so you can choose the time that works best for you.

8:30 AM - 10:30 AM - High Intermediate in Room 29

10:30 AM - 12:30 PM - Advanced/Transition in Room 30

A field trip to the World War II and "Rosie the Riveter" museum in Richmond on July 14<sup>th</sup>.

Come just for She Built Ships, or stay longer to continue improving your English. If you can stay for full school day - from 8:30 - 12:30 (12:00 on Fridays) - we have many more interesting activities planned!
